

GyroMini™ and Enduro MiniMix™ Nutating 3-D Mixers

The *GyroMini* and *Enduro Mini Mix* are small mixers that combine the motions of an orbital shaker and a rocker to produce a three dimensional action. This action provides thorough yet gentle mixing without foaming.

The pitch and speed of the *GyroMini* are fixed to provide the optimal motion for mixing and resuspending samples in small containers such as blood and centrifuge tubes. A dimpled mat on the platform surface holds tubes firmly in place. The mat will hold as many as 60 x 1.5 ml tubes, 30 pediatric blood tubes (3 ml), 21 standard blood tubes (7 ml), 17 x 15 ml tubes or 9 x 50 ml tubes.

The *Enduro MiniMix* has a pitch and speed that produces the perfect motion for processing western blots and staining gels. The tilt angle is large enough to provide thorough distribution of solutions, yet is small enough to keep the center of the blot from drying out. Minimal amounts of solution can be used, conserving valuable probes and antibodies. A non-slip mat holds blotting boxes in place on the platform.

Both shakers may be used in temperature controlled environments.
